About OTF

» Strategic Goals

Putting Oman on the map of the pioneers of knowledge economy in the Middle East and North Africa

Making the Sultanate the preferred destination for emerging technology companies at the regional level, and an attractive and stimulating destination for venture capital investments

Diversification of the Omani government asset base and income sources. It primarily aims to achieve sustainable economic growth through:

Direct investment in local companies

Facilitate entry of foreign companies to work in the Omani local market

Transfer and localization of modern technologies that help to shift towards a digital society

Fund's investment programs

The Oman Technology Fund manages its business through three investment programs covering investments in various stages of growth.

otf Techween

program aims to create support for companies or owners of ideas in the stage of aligning the product / service with the market and verify the effectiveness of the business model. This is accomplished by providing a package of services for emerging projects enrolled in the program, which include:

3-month training program Corporate

Orientation Funding

50 thousand US dollars for each company by 10 companies per batch

otf Wadi

program aims to grow and invest in emerging projects to achieve sustainability through aligning the business model with the market and linking it with a network of experts, individual investors and venture capital. Companies enrolling in the program will also benefit from additional financing and a range of services, including:

3-month training program Corporate

Orientation Funding

100 thousand US dollars for each company by 10 companies per batch

otf Jasoor

The investment in the investment program Jasoor is compatible with companies with international capital. The program offers the following services:

Investing in the advanced stages

Expansion to regional and global markets

The size of the investment is 500 thousand - 3 million US dollars

Logistics Sector

About:

An Omani company provides a captain on-demand and door-to-door delivery. Today it has more than 2,500 Omani youth captain among the Sultanate of Oman. The company has worked to change the traditional work concepts of young people to work in their free time using their personal resources (participatory economy) to obtain additional income.

About:

A system that converts regular school buses into safe and smart buses in order to ensure the safety of students on the bus. It is a combination of advanced electronic devices and smart systems to benefit the school administration and parents and help to detect cases of students death due to forgetting them on those buses.

➤ Agriculture Sector

About:

Beekeepers are allowed to facilitate bee management by remotely monitoring temperature, humidity, and hive cell activity.

About:

The Intelligence Laboratory is a company focused on developing and marketing unmanned surface ships (USVs) to transport fish feed to offshore aquaculture. At present, fish is the most widely traded food commodity, supported by growth in fish farming, which includes commercial fish farming in tanks or food packaging.

Finance Sector

About:

TelyPay app is an e-payment wallet that can be topped up using prepaid telecom cards. Online payment platforms have a blind spot for unbanked and traditionally conservative customers. As a result, most online payment platforms require some level of bank dependency to facilitate their services, which leaves the unbanked behind.

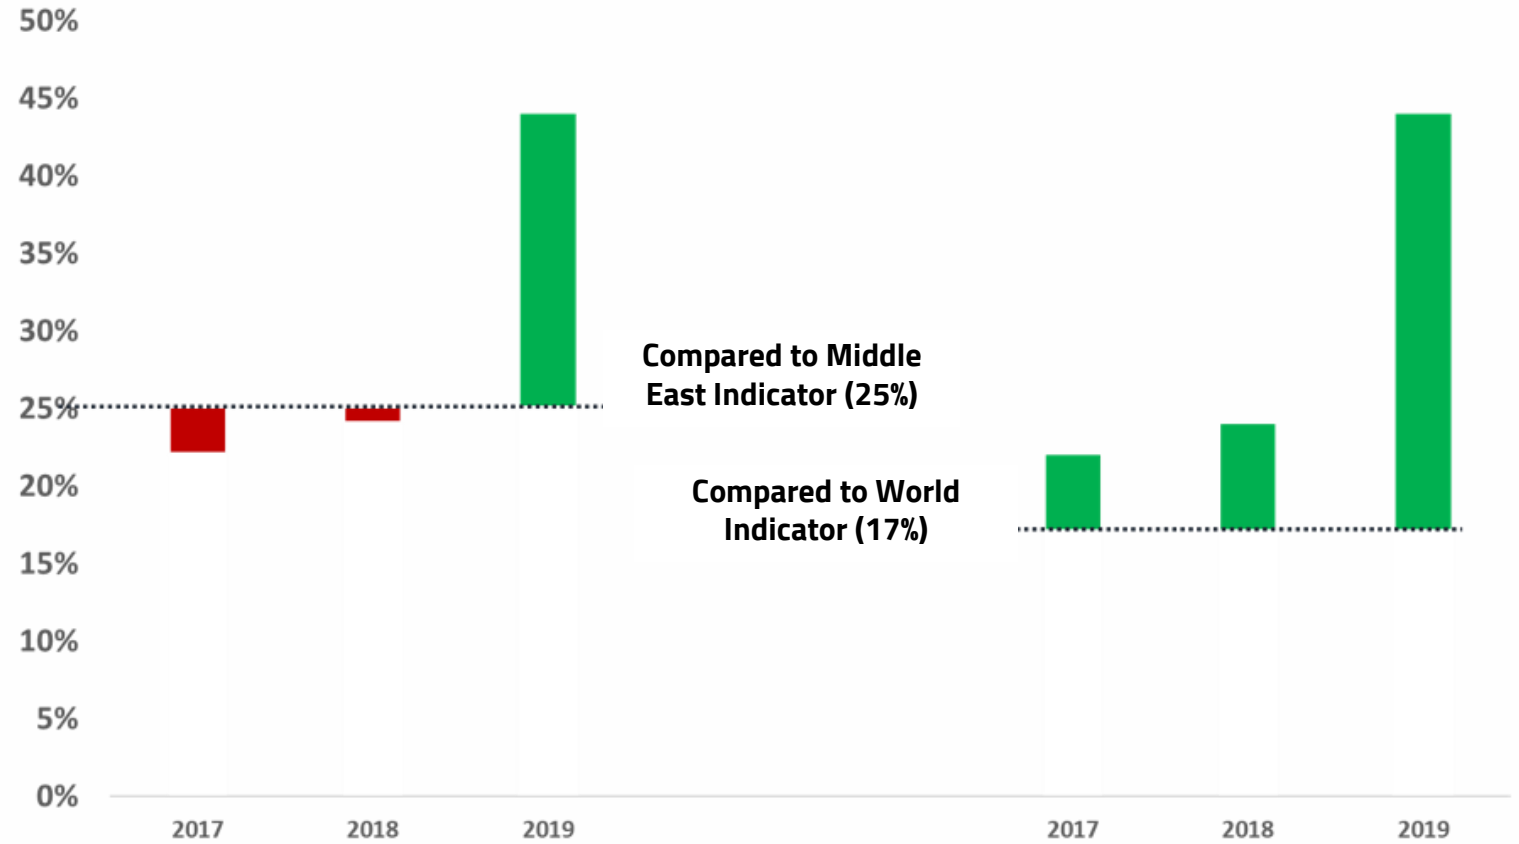

About:

AlgoDriven helps car dealers, banks, insurance companies and motor industry participants accurately inspect, price and identify used cars. AlgoDriven provides advanced technology solutions to the automotive industry and its participants - providing fast, accurate and real-time data.
